The feet are positioned in wide stance, at least shoulder-width apart, and the exercises are often performed barefoot. Ai Chi has been used to improve movement efficiency in clients who have chronic pain, arthritis, fibromyalgia, chronic obstructive pulmonary disease, balance deficits, diabetes, multiple sclerosis and other orthopedic and neurological conditions. Tabata Bootcamp™
A true Tabata Bootcamp™ workout is founded on quality, not quantity. In other words, the effect of a workout should not be based on the amount of time devoted to exercising, but rather what the exercise does for your body after the workout is over. Done the Tabata Bootcamp™ way, you not only burn calories during the exercise, but your body keeps burning extra calories for the next 24 to 48 hours. Tabata Bootcamp™ training is a unique and revolutionary approach to successfully lose weight and build muscle in minimal time. The unique protocol used in Tabata Bootcamp™ is the 20-10 microburst intervals. An interval consists of performing specifically chosen exercises at an ultra high intensity for 20 seconds, followed by 10 seconds of rest. The beauty behind these short microbursts is that 20 seconds at high intensity is doable and the 10 second rest allows for brief recovery before moving on to the next exercise interval. These 20-10 microburst intervals are stacked in the 30 minute group workouts in specific sequences of different exercise movements that target every part of your body. The 6 minute workouts also stack 20-10 intervals using just a few select exercise movements that deliver a short yet high metabolic boosting workout. This short duration, but high intensity interval training (HIIT) creates a prolonged after burn, or EPOC (excess post oxygen consumption). This type of training causes the body to take longer to return to its state of rest, so it continues to burn calories (5x more) at a higher rate long after the workout session has completed. Put simply, a 4-minute Tabata Bootcamp workout can reap the same benefits as a longer but steady workout, like running for a half hour. The results with microburst workouts are backed by research.

WALKING TRACK

Want to exercise but not sure where to start? Walking is one of the best forms of exercise. Did you know that walking is a form of weight bearing exercise? Weight bearing exercise helps increase bone density which then helps prevent osteoporosis. The Centers for Disease Control and Prevention/American College of Sports Medicine recommend 30 minutes of moderate-intensity activities 5 or more days a week. Regular physical activity significantly reduces the risk of cardiovascular disease and risk factors such as high blood pressure, diabetes and obesity. So, find a friend and start walking! Please adhere to our designated lanes for walkers and runners as well as the designated direction for that day. Monday, Wednesday, Friday and Sunday-Clockwise/Tuesday, Thursday and Saturday-Counter Clockwise. If you need some help keeping track of the laps you’ve walked, stop by the front desk and purchase a tally counter to log your laps and miles. Children under 12 must be accompanied by an adult at all times. Stroller times are limited to Monday-Friday 8:00 am – 3:00 pm, Saturday and Sunday 1:00-3:00 pm.

RACQUETBALL

The Wytheville Community Center offers two full-size racquetball courts located on the second floor adjacent to the climbing wall for your fun and entertainment. Please adhere to the policies and rules for availability and reservations. Children under the age 12 may not use the racquetball courts unless playing with an adult or person older than 16. Goggles are strongly recommended for all participants to protect from eye injuries. Check at the Front Desk to make reservations as well as availability for goggles, balls and racquets.
